This corrects the article “Evaluation of the clinical and radiographic effectiveness of treating peri-implant bone defects with a new biphasic calcium phosphate bone graft: a prospective, multicenter randomized controlled trial” in volume 53 on page 306.

In the original publication of this article, there was a errors in the main text. The revised sentences are shown below.

p314

The novel BCP used in this study had a mixed pore structure of macro pores (100–500 μm) and micro pores (10–50 μm) and consisted of 60% β-TCP and 40% HA.

p315

Within the limitations of this study, GBR with BCP consisting of 60% β-TCP and 40% HA showed favorable clinical and radiographic outcomes for peri-implant dehiscence defects.
